

BUFFALO INDUSTRIAL EXHIBITION

Under the Auspices of THE MANUFACTURERS' CLUB

PRICE 10 CENTS

Beyer & Williams Company

MANUFACTURERS of the famous B. & W. Skirts and the Fine-Form Maternity Skirt, have one of the most modern and up-to-date factories in the world. This factory is located in the handsome new fireproof building at Main, Goodell, and Washington streets. Modern science cannot produce a lighter or more sanitary factory—daylight in every corner—Every garment is thoroughly inspected and absolutely warranted.

Maternity Skirt

of great interest to
Every Prospective Mother.

Something new — only scientific garment of the kind ever invented. Combines solid comfort and ease with "fine form" and elegant appearance in the home, on the street, and in society. — **Always drapes evenly in front and back** — no bulkiness — no draw-strings — no lacing — no ripping or basting. — **Can be worn the year round.**

Made in several styles, and at prices lower than you can buy the material and have them made at home.

FREE Send for our **Fine Illustrated Book** — "Fine-Form Maternity Skirt" — It's **FREE** to every woman writing for it. Tells all about these skirts, their advantages, styles, material, and cost. Gives opinions of physicians, dressmakers, and users. **10 Days Free Trial.** When you get our book, if your dealer has not yet been supplied with Fine-Form Maternity Skirts, make your selection of material and style, and we will make the garment to your order. When you get it, **wear it ten days, and if you don't find it exactly as represented, send it back and we will cheerfully refund every cent paid.** **Other Skirts** — If not in need of a maternity skirt, remember our famous B & W dress and walking skirts will positively please you — **same guarantee** — Illustrated book free. Which book shall we send? Write to-day to
Beyer & Williams Co., Dept. 46 Buffalo, N. Y.

WARNING

To protect you against disappointment we caution you that the *Fine-Form Maternity Skirt* is the only "Maternity Skirt" on the market, as it is the only skirt which can always be made to drape evenly, front and back — all substitutes offered will rise in front during development — a fault so repulsive to every woman of refined tastes. No pattern can be purchased anywhere for this garment. Its special features are protected by patents.

Dress Skirt

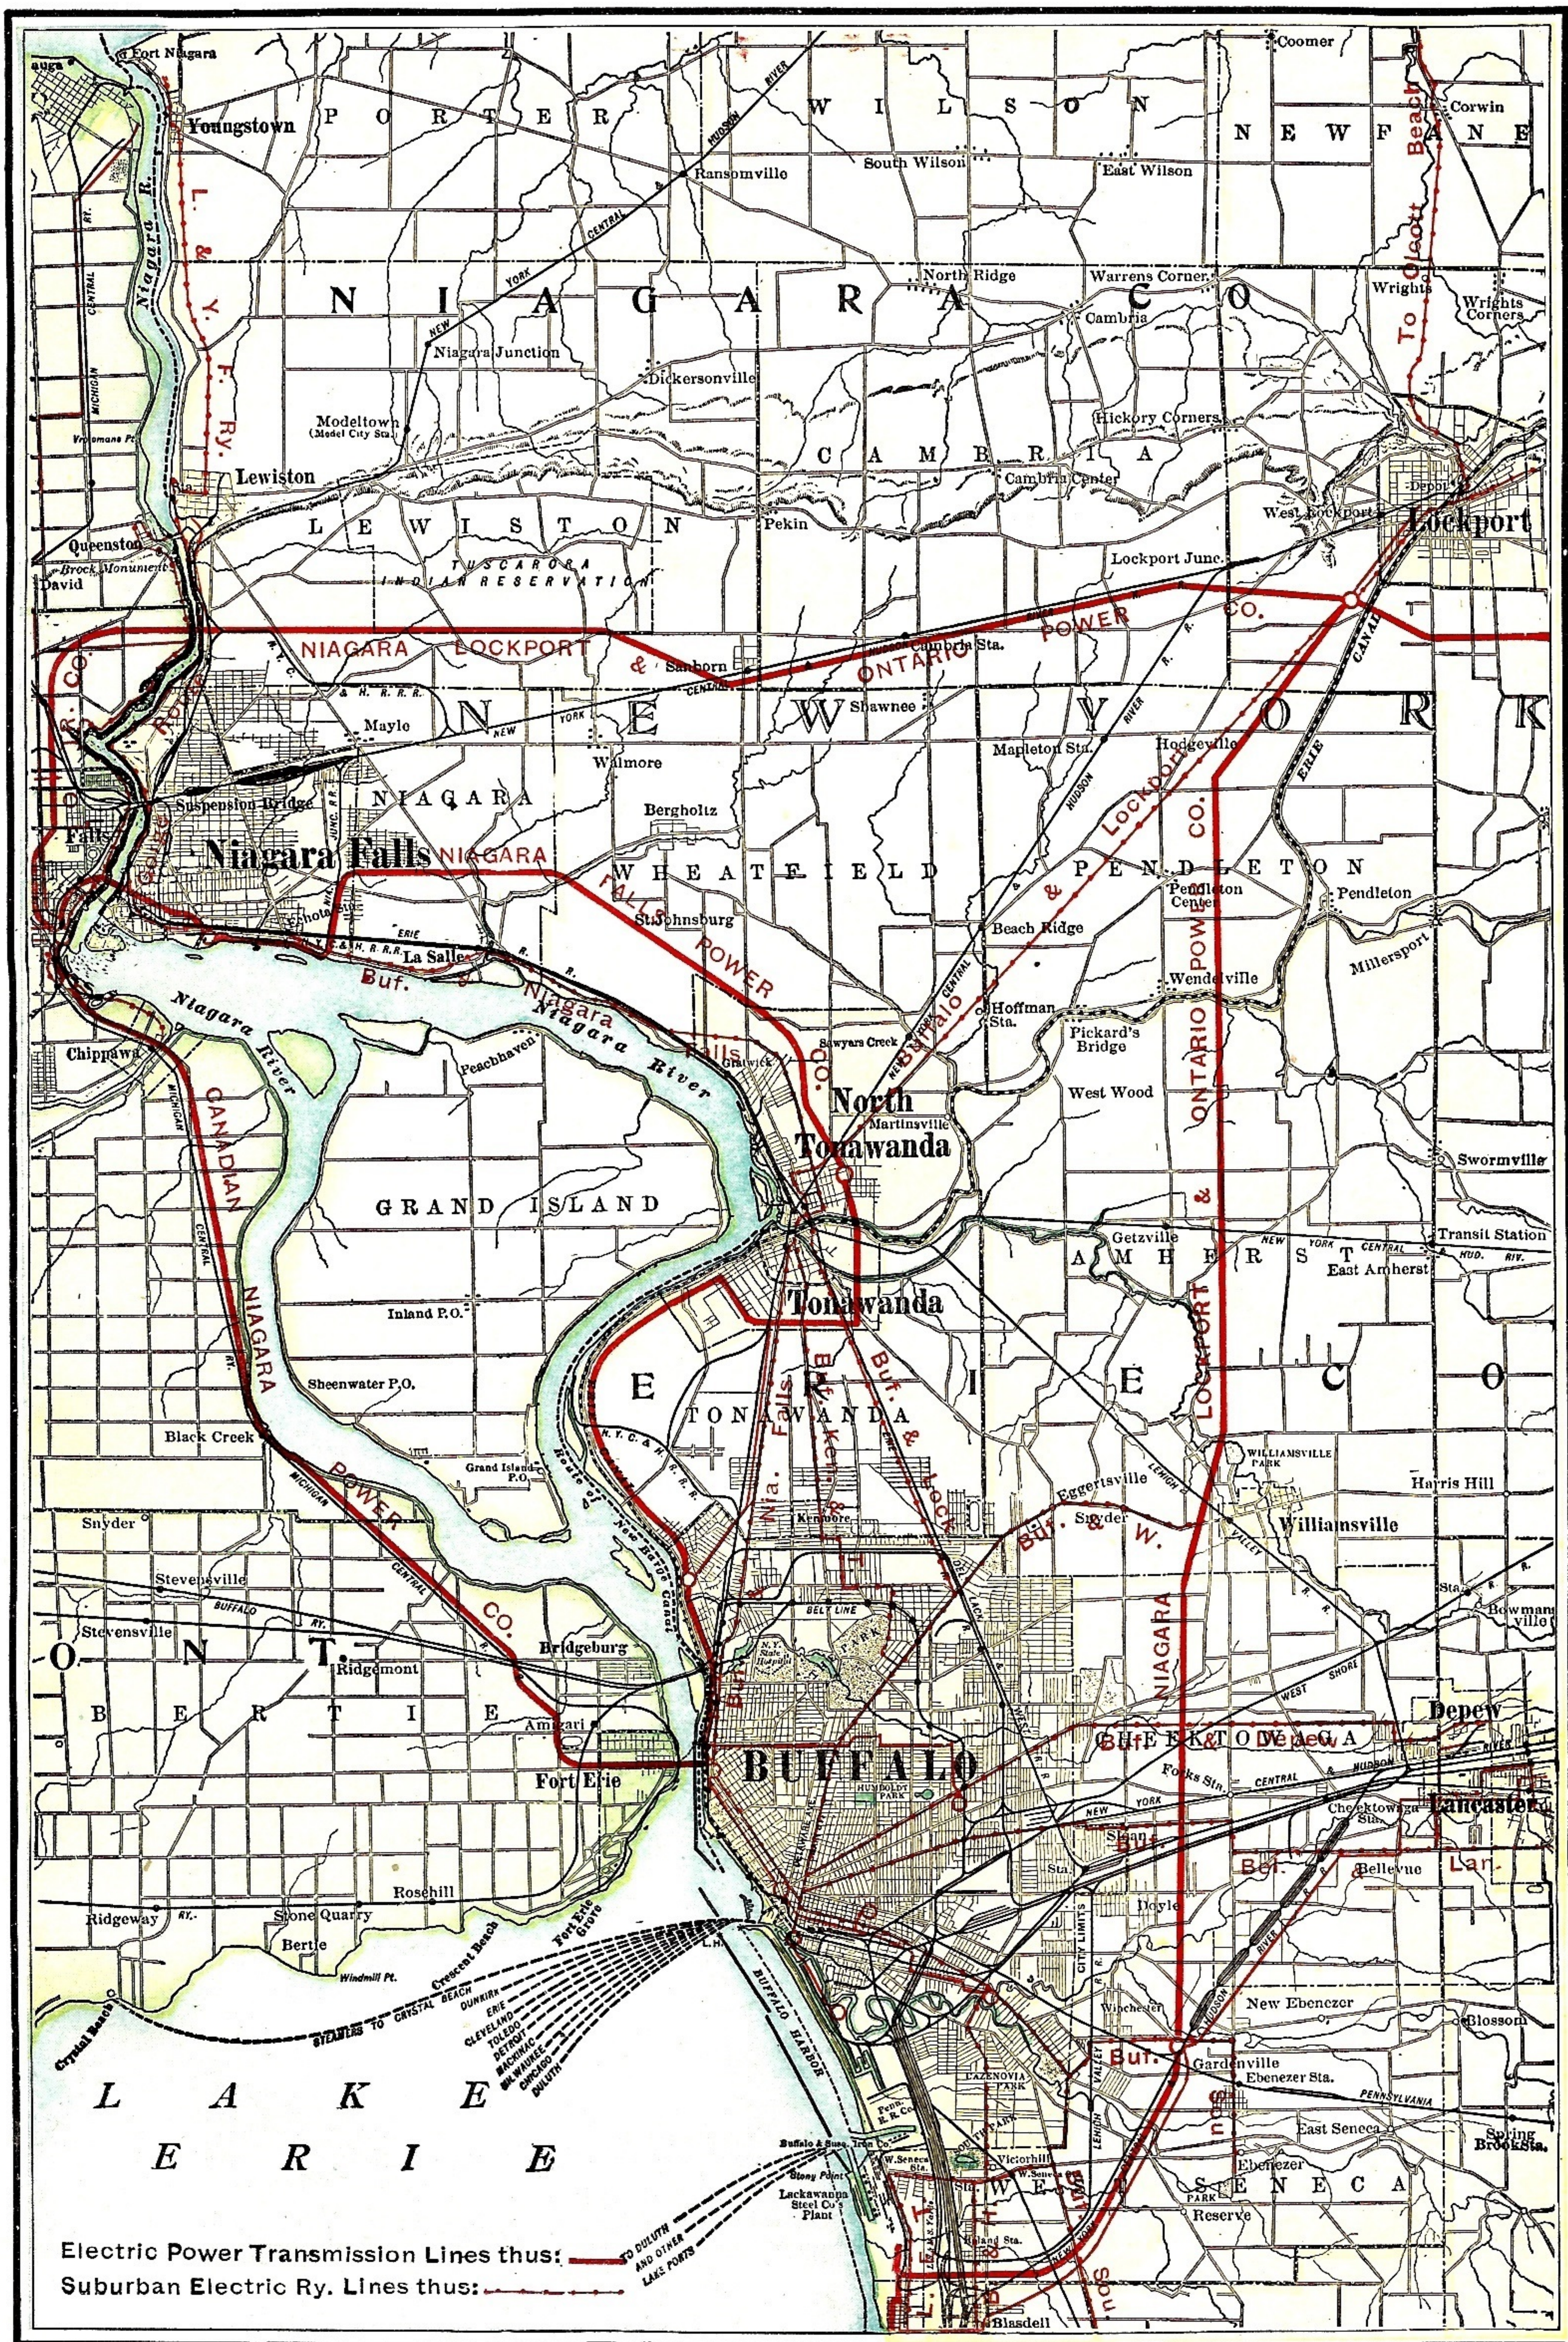

Copy of advertisement running in practically all leading publications.

The **Fine-Form Maternity Skirt** is one of the most popular garments made in this country. — It is known the world over, and sold in every civilized land on the globe.

The **B. & W. dress skirts** are noted everywhere for quality of material, style, and workmanship — not cost, but quality, is the first demand made of every piece of goods which enters into the skirts leaving this factory.

We prefer that you purchase from your dealer, but if he cannot accommodate you, send us his name and we will see that you are supplied.

THE BELL SYSTEM

A BUFFALO BUILDER

FOR thirty years the Bell System has served the business men who have built up Buffalo's commercial greatness. It has made it possible for Buffalo Boosters to work quickly and economically. The Bell System developed the first mechanical toy telephone of 1876 into the practically perfect Long Distance instrument of to-day, and it built a plant in Buffalo which covers the local field exhaustively and efficiently, making it practical for the Buffalo Telephone user to talk to every business man within 1,000 miles through the lines of the American Telephone and Telegraph Company—carrier of the Nation's Long Distance telephone communications.

Exposition visitors are cordially invited to call at our public station, which we are maintaining for their convenience. Look for the "Sign of the Blue Bell"—where a switchboard connects telephones in the various exhibitors' booths with our Exchange System. Free Buffalo service is extended to all from any telephone in the Exposition Hall.

BELL TELEPHONE COMPANY
22 W. SENECA STREET SENECA 9047

BUFFALO'S population (last police census), 423,493.

ACREAGE of the city, 25,343½.

PARKS, 1,025½ acres.

Park driveways, 21 miles.

PUBLIC SCHOOLS, 62; four high schools.

THEATERS, 9.

CHURCHES, 236; 2 cathedrals.

LIBRARIES — Free Public Library with 320,000 books; Grosvenor Reference Library with 80,000 books; library of Buffalo Historical Society with 25,000 volumes and 10,000 pamphlets.

BANKS — 18, including three trust companies and four savings banks. Total capitalization of banks (exclusive of savings banks) \$6,500,000.

Total deposits in the eighteen banks, \$146,390,629.

Surplus of savings banks, \$5,234,086.

Clearings through Clearing House Association last year, \$424,689,975.34.

ALBRIGHT ART GALLERY, of white marble, valued at \$450,000.

PAVED STREETS — Stone 105 miles; brick, 15½ miles; macadam, 5 miles; asphalt, 335 miles. Buffalo has more asphalt pavements than Paris, Washington, or London.

UNIVERSITY of Buffalo, D'Youville College, Canisius College, Holy Angels College, Sacred Heart Academy, Mount Saint Joseph's.

HOSPITALS and infirmaries, 18.

WATER — Unlimited and pure supply from Lake Erie.

Rate to manufacturers, six cents per first 1,000 gallons and two cents for each subsequent thousand.

Pumps at water works have a capacity of 212,000,000 gallons each 24 hours.

A MANUFACTURING center cannot grow up anywhere. There are many small towns which offer free sites, exemption from taxation, etc., to induce manufacturers to build plants within their limits. Yet, with few exceptions, the great manufacturing plants are found in or near cities which offer none of these gifts. The reasons for this are easily seen. A manufacturing business, in order to be successful, must have a location which combines a number of advantages, natural and artificial. It must be conveniently accessible to its raw material. It must be where it can obtain reliable and economical power. It must be within easy reach of markets. It must be able to command an ample labor supply. It must be supported by an adequate banking power.

THIS DESCRIBES BUFFALO

These are the great essentials, recognized universally, as points upon which the general manufacturer must insist. But there are other elements, hardly less important, though more often overlooked. It is desirable that the land on which a plant is built should be moderately high and level with just enough slope to afford good drainage, for a factory without sewers would soon make itself a pest-hole. As a rule a great saving can be made in building if the plant can connect with a well-planned city sewer system. Another important point is to find a solid rock foundation, not too far below the surface. Well-paved streets add greatly to the economy of operation by reducing the cost of team haul, which is usually a heavy item of expense in conducting a large business. The amount of water re-

A HALF DOZEN REASONS

Why You Should Patronize
Members of the

REAL ESTATE ASSOCIATION

OF THE

CHAMBER OF COMMERCE

1. Because it is the aim of this Association to admit to membership only men of reliability and good standing in the community.
2. Because this Association does not tolerate any unbusinesslike or questionable acts on the part of any member.
3. Because if you list your property for sale with a member of this Association you are assured of the coöperation of not only all the other members of the organization, but also of the Chamber of Commerce.
4. Because if you want to buy or sell Real Estate, members of this Association are in a better position to give you fair treatment and prompt service because of their coöperation.
5. Because the Association makes it its particular business and has for its special object the elevating of real estate conditions and the equalization of the burden of taxation for the benefit of every present or prospective home owner of the city of Buffalo.
6. Because you owe the duty to yourself and your city to patronize those who are working toward its greater and better development.

WHY NOT MAKE APPLICATION FOR ASSOCIATE MEMBERSHIP ?

ELECTRIC POWER — Buffalo manufacturers are within 20 miles of the tunnels of the Niagara Falls power companies. Power obtainable in practically unlimited quantities.

Total horse power developed on the American side, 155,000; on the Canadian side, 175,000. Another unit of 50,000 horse power will be working on the American side in two months.

Niagara horse power used in Buffalo last year, 65,000.

Power sold here for \$29 per horse power per year as against \$67, the next cheapest rate in any city in the United States.

RAILWAYS — 16 trunk lines enter city daily: the New York Central, Erie, West Shore, Lehigh Valley system, Delaware, Lackawanna & Western, Pennsylvania, Lake Shore & Michigan Southern, Nickel Plate, Grand Trunk, Michigan Central, Canadian Pacific, Buffalo, Rochester & Pittsburg, Wabash, Buffalo Creek, Pere Marquette, Buffalo & Susquehanna and Toronto, Hamilton & Buffalo.

(a.) Best railroad yard facilities in world. Four hundred and fifty miles of trackage in city; 210 more miles now planned for new terminal improvements.

(b.) Railroads own 3,800 acres of land in city.

COAL TRADE — Receipts by rail in 1907, 11,494,064 tons.

Shipments by lake, 3,449,695 tons yearly.

Shipments by rail, 6,007,225 tons average yearly.

Six coal pockets with a capacity of 35,500 tons.

(a.) Largest coal pocket in world at Cheektowaga, the Lackawanna trestle, nearly one mile long. Its capacity is 100,000 tons storage.

RATES: Lake freight on hard coal from Buffalo to Milwaukee and Chicago, 40 cents; to Duluth, 31 cents.

IRON ORE — Receipts, 5,392,800 tons.

Ore on docks, 435,407 gross tons.

Eight ore docks with total frontage of 23,500 feet or about 4½ miles.

Total Bessemer production in 1907, 13,231,620 gross tons.

Total pig iron production in 1907, 1,405,635 gross tons.

Steel Plants — Lackawanna, Goodyear, Buffalo and Susquehanna, Buffalo Union Furnace, Wickwire Steel Co., Tonawanda Iron and Steel Co., New York State Steel Co., with a total capitalization of nearly \$150,000,000.

BUFFALO HARBOR — Longest breakwater in the world.

quired by different industries varies greatly, but all manufacturing plants must have an unfailing water supply. They should not be subject to suspension and the consequent loss of orders because of drouth or floods.

This enumeration of points to be considered in locating a manufacturing business will be recognized by men of experience as covering substantially all the elements that, when combined, make the most practicable site attainable. It will be recognized by the people of Buffalo as a correct description of their city.

RIVAL ROUTES TO SEABOARD

No city has better transportation facilities than Buffalo. The map proves that better than words can, and the statistics of business actually handled here reinforce what the map shows. But there are points which may easily escape even those who fully appreciate the great advantage afforded by sixteen lines of railroad and by water transportation eastward to the seaboard and westward to the very heart of the continent. One of these points is that there are available two routes to the seaboard, terminating in widely separated and rival ocean ports. This is a matter which will be of more interest in the future than it is now. With the completion of the barge canal, the larger Buffalo manufacturers undoubtedly will have fleets of barges of their own. These 1,000-ton boats can be sent through the Welland, Lake Ontario, and the Saint Lawrence River to Montreal as well as through the Erie Canal to New York. Thus a company manufacturing for the export trade could take advantage of any cheaper ocean rate that might be offered by the Canadian port or could avoid delay in the event of a canal break. Moreover, a Buffalo manufacturer who has an export consignment large enough to make a cargo for a specially chartered boat can send it, without transfer, from Buffalo to any port in the world. The Canadian canals will pass vessels of fourteen feet draft. This ability to ship independently of railroads or of established steamship lines, even if little used, must always exert an important influence on freight rates.

FOR ASSEMBLING MATERIALS

It is unnecessary, however, to speak of more than the transportation advantages already developed and in use in order to prove the superior location of Buffalo both for assembling raw materials and for reaching the best of the domestic as well as the foreign markets. Transportation facilities are what give Buffalo these

It is more than 25,411 feet long, which is nearly 4.8 miles.

Entrance channel, 23 feet deep, 300 feet wide for 2,200 feet outward from the outer end of the north pier.

Breakwater encloses an outer harbor 4.8 miles long and more than half a mile wide.

Cost of improvements in Buffalo harbor to date, \$5,129,013.

Vessels arrived in 1907, 4,159 with a total tonnage of 7,278,830.

Vessels cleared in 1907, 4,194 of 7,371,412 tonnage.

Principal receipts by lake are wheat, corn, oats, iron ore, lumber, copper, pig-iron, glucose, lard, and pork. Shipments are principally coal, sugar, salt, and cement. Shipments and receipts by lake and river annually amount to 16,000,000 gross tons.

ERIE BASIN — Channel 2,300 feet long and 400 feet wide is being dredged to a depth of 23 feet at mean lake level from Buffalo harbor main entrance channel to Erie Basin and a branch channel and basin 1,920 feet long and 500 feet wide to a depth of 23 feet will be dredged as far as the Black Rock harbor at an estimated cost of \$814,643. This work is more than 75 per cent. completed now.

BLACK ROCK CANAL — Estimated cost, \$4,500,000; size of lock, 600 feet long; 70 feet wide.

ELEVATORS — Twenty-eight, with a total storage capacity of 24,190,000 bushels of grain; transfer capacity for each 24 hours, 5,500,000 bushels.

Largest of the steel elevators, Great Eastern, with a capacity of 2,500,000 bushels; Electric, 2,000,000; Dakota, 1,250,000; Mutual, 2,800,000.

Grain handled here in 1907 (exclusive of flour and flaxseed), 135,200,000 bushels. Record for this year because of a very dull season on the lakes will be about 120,000,000 bushels.

Total of grain exported from elevators over railroads, 70,000,000 bushels in 1907. This year will fall short of that mark by nearly 2,000,000 bushels. Total of railroad export in the banner year, 1900, was 127,000,000 bushels.

Rates, elevating and ten days' storage one-half of one cent per bushel.

Average yearly totals of grains received here: Wheat 45,000,000 bushels; corn, 22,000,000; oats, 20,000,000; barley, 10,000,000; rye, 1,500,000; flaxseed, 12,000,000.

advantages. The city is not built among iron mines or coal mines, but it is at the point where iron ore and coal can be brought together at the least cost of carriage. The ore comes from the Lake Superior region and, when the barge canal is completed, will also be shipped here from the less famous, but important, mines of the Adirondacks and of Central New York. The coal and coke come direct from the mines in Pennsylvania and there are extensive limestone deposits here. It has been computed that the net advantage in freight charges of Buffalo over Pittsburg on the materials used in making a ton of foundry iron is, at least, 65 cents.

This is what has given Buffalo its iron and steel plants. But Buffalo is likewise the natural point for grinding the grain shipped down the lakes and for sawing and planing the lumber which the lake boats carry. In fact, an attempt to enumerate the different kinds of raw material which can be profitably assembled here would cover nearly all the natural products of the country.

REACHING THE BEST MARKETS

There is another branch of manufacturing, however, which is receiving much attention. This is the working up of prepared materials into finished products ready for sale to the general public. It includes such lines as the making of automobiles, the preparation of cereals, the building of mechanical specialties, etc. Such manufacturing is particularly desirable, for it requires the highest grade of skilled labor, and, therefore, tends to build up a population of superior intelligence and to make a rich community. While the availability of raw material is important in this general manufacturing, the convenience to markets is the first consideration. The saving of a few dollars in freight rates often makes the difference between a profitable and an unprofitable contract. A 500-mile circle around Buffalo takes in nearly half the population of the United States and the best part of Canada, and there is hardly a point in this vast territory which is not reached either by direct railroad lines or by water route or by both.

COMING GREATNESS

The logical and correct conclusion from that statement is that, under natural conditions relative to service and rates, there is no point on the continent from which a larger number of persons can be reached in less time or at less cost than can be reached from Buffalo. It was with this particular fact in mind that the famous

Attention!

Manufacturers!!

Do you ship freight?

Are you getting the best rates?

Are you fully advised on all matters pertaining to this important end of your business?

If your answer is "yes," read no further.. If you are credulous! Attend.

The Manufacturers' Club of Buffalo offers through its Traffic Bureau most valuable assistance and information on all these important items.

Mr. William H. Frederick, formerly traffic manager of the Bethlehem Steel Company, and for two years acting in the same capacity for the Black Rock Manufacturers' Association, is in charge of the traffic department of the Manufacturers' Club, and is prepared to assist you on questions of rates, best freight routes, handling of claims, classifications, etc.

**Can you afford to be
without it?**

For further information, call Bell, Seneca 2190, or Frontier 3841, and ask for the Traffic Bureau of the Manufacturers' Club.

FRED M. SULLIVAN,
Chairman of Traffic Bureau Committee.

WM. H. FREDERICK,
General Manager of Traffic Bureau.

FLOUR — Total number of barrels of flour manufactured here in 1907, 2,625,683; in the mills outside the city, 481,000, making a total of 3,107,529 barrels for the year.

Aggregate receipts of flour in 1907, 9,759,000 barrels or approximately, 48,000,000 bushels.

Largest flour mill in the country here when the addition to the Washburn-Crosby plant is built at Ganson and Michigan streets. Plant will then have a daily capacity of 6,000 barrels.

LUMBER — With the ports at the Tonawandas, Buffalo, standing at its commanding position at the head of the Great Lakes, is the greatest lumber port in the world.

Receipts by lake in 1907, 141,600,000 feet; by rail, 165,800,000 feet; by canal, 94,000,000 feet; total of 401,400,000 feet.

Shipments by canal, 94,389,000 feet; by railroads, 153,384,750 feet; total, 247,773,750 feet.

Lumber on hand at beginning of 1908 season, 184,798,825 feet, cut from all the forests in the world, affording the local builder peculiar advantages in his choice of woods.

Laths, 2,672,000 pieces handled here in 1907; shingles, 223,444,000 handled here in 1907; in 1905, 295,950,000; railroad ties, 40,000 received by lake; fence posts, received by lake, 50,000.

POLICE DEPARTMENT — Number of stations now in use, 13, with two sub-stations. Another station will be established in a few months.

One harbor patrol steamer, the "Grover Cleveland."

Number of men on the force, 790. An extra 100 have been asked for by Police Chief Regan and the police commissioners.

FIRE DEPARTMENT — Engine companies, 32; chemical engines, 6; hook and ladder companies, 10. Largest ladder in the State is in use in Buffalo; can be extended to reach to the tenth story. Three fireboats. Number of men on the force, 600.

High-pressure pipe lines in Pearl and Washington streets.

CITY TAXATION — City general rate, \$19.57 per \$1,000. County and State rate, \$3.21.

Total assessed valuation of Buffalo property, \$298,176,699.

Total valuation of unassessed property, \$48,777,620.

STREET RAILWAYS — International Railway Company controls 193 miles in the city limits with more under

world traveler and lecturer, Burr McIntosh, on his recent visit to this city, declared enthusiastically that in fifteen years Buffalo would be the second largest city in the United States. Since that is the way our future looks to an outsider, a man who has seen every important city in the civilized world, why should Buffalonians lift their eyebrows over the prediction? Why not set unitedly to work to make it come true?

THE PUBLIC SERVICE COMMISSION

In this connection it is not out of place to say that the State has put into the hands of Buffalo business men the means of assuring to themselves the advantages which naturally belong to them. The shipper has only to complain to the Public Service Commission in order to secure prompt investigation and correction of any injustice in rates or conditions of traffic. One of the commissioners is a Buffalo man and the chairman lives in Jamestown and knows Buffalo thoroughly. The commission has established a branch office here with an inspector in charge to whom complaints of defective service may be made. The Manufacturers' Club and the Niagara Frontier Shippers' Traffic Association have already made free use of the opportunity offered by this law with very beneficial results, and they constitute organized forces through which action may be taken. There is no other State in the Union which has such a Public Service Commission as this, and there is no other city in the State which is in position to benefit so much by it.

ELECTRIC POWER UNLIMITED

This same Public Service Commission has control, not only over transportation companies, but also over companies handling power and other public utilities. The fact that its authority covers gas and electric companies is an important one to consider in discussing the advantages of a city which is within piping distance of both the Pennsylvania and Canadian natural gas fields, and obtains gas from both sources, and is only twenty-two miles from Niagara Falls, where electricity to the amount of 370,500 horse power is developed. Buffalo is using a great quantity of this Niagara power now. It is the best power in the world. It is economical. It is available in almost unlimited quantities. It is one of Buffalo's best business assets. It is virtually unfailing. The stoppages have been so rare that it may be said Buffalo manufacturers using this power have less trouble than manufacturers elsewhere commonly endure through a failure of fuel supply on account of strikes in the

construction and contemplated. Total trackage of company, 400 miles.

LIFE SAVING SERVICE—Headquarters of the tenth district has been at Buffalo since establishment in 1876. Buffalo station is in control of eleven stations each of which are manned by eight surfmen and one keeper or captain.

Each station is equipped with a 26-foot English model life boat, an open surf boat, a self-bailing life-saving service boat, and a 34-foot life boat.

CUSTOMS HOUSE—Receipts for 1907, \$1,009,416.32; for 1906, \$751,475.55; for 1905, \$649,344.09. Receipts for 1908 will be in excess of 1907 figures by nearly \$30,000.

Value of commodities admitted free of duty last year, \$3,292,283, which included 3,850,000 raw and pickled hides valued at \$1,000,000, and \$816,000 United States products exported and returned.

Value of commodities subject to duty, \$4,809,159.

(a) Articles included: 12,113 cattle; 239 horses; 71,419 sheep; 264,000 pounds of live fowl; 10,004,495 pounds of fish; 2,084 dozens of eggs; 71,089,000 feet of boards and planks; 35,735 gallons of brandy and other spirits; 24,514 gallons of wines, and 1,971 pounds of cigars.

Total value of the commodities imported here, \$8,101,441, of which Canada contributed \$5,959,399; Germany, \$494,000; France, \$326,000; Argentina, \$424,000; Turkey in Europe, \$23,000; and England, \$287,000.

Value of the commodities exported to Canada last year, \$34,935,000.

Internal revenue receipts for 1907, \$1,363,000.

POST-OFFICE—Federal building of granite and marble, built at a total cost of \$2,500,000. Fred Greiner, postmaster

Receipts for the year ending December, 1907, \$1,559,684.36.

LIVE STOCK—Yards at East Buffalo, second largest in the world, cover nearly 250 acres and have accommodations daily for 30,000 head of cattle.

Sheep shed here is the largest in the world.

Total yearly value of the live stock handled here is estimated at approximately, \$10,000,000.

Receipts for 1907: Cars of cattle, 8,365. (a) hogs, 11,554 cars; (b) sheep, 6,396 cars; (c) mixed cars, 3,736; (d) horses, 1,087 cars.

coal fields, railroad delays, floods, etc. The companies handling it are under the management of Buffalo men, who are themselves enthusiasts in the development of Buffalo.

And when all this has been said, the Buffalonian does not have to stop there. He can also point out that if, at any time, conditions should not be satisfactory the State has given to Buffalo business men the machinery for securing a remedy.

COMPETITION IN COAL

Moreover, Buffalo taps the coal fields by means of five distinct and competitive lines of coal-carrying railroads. The price of coal here is usually cheaper than anywhere else outside the mining districts.

RECORD OF THE BANKS

The record of Buffalo during the money stringency of last year is the best possible evidence of the strength and soundness of its banking power. No clearing house certificates were used here. There were no deferred payrolls. Accommodations were at all times available to the prudent business man. Buffalo came through the stress with less inconvenience than any other city in the country. A manufacturing business cannot be conducted at all without good banks to support it. Buffalo has such banks.

GENERAL ADVANTAGES

Buffalo is on high, firm ground, with no quicksands underneath, but a solid rock foundation which, in places, comes so near the surface that this is, perhaps, the only large city in the world where quarrying is an important industry. The population figures are proof of the adequacy of the labor supply. The sewerage system is complete. No streets which carry any important traffic are left unpaved, and macadam highways, built by the State and county, now reach for miles into the surrounding country from every important entrance to the city. All Lake Erie is available for water supply. One of the largest pumping plants in the United States is now in operation and a duplicate plant is under construction. In addition to a very complete city and suburban trolley system, there are three steam railroad belt lines offering manufacturing sites with trackage all around the city, and a fourth is under way that will also extend along the Niagara River to accommodate plants built there. The United States Government is constructing a ship canal which will open the lower river to navigation by the largest vessels and make the entire river bank

Erie County Bank Building

Shipments from the East Buffalo yards last year, grand total, 33,360 cars.

New association of drovers and cattle dealers proposes to build concrete and steel yards near Cheektowaga next year which will be the largest in the world, covering 600 acres.

MANUFACTORIES — Industrial establishments in city number approximately 5,000 with 5,280 proprietors.

Employees: 70,000.

Capital invested, \$250,000,000 (approximately).

Value of products in 1907, \$210,846,114.

Salaries to employees, yearly total (approximately), \$5,835,099.51.

Land and buildings valued at, \$30,000,000.

Buffalo has 469 more industries this year than in 1906.

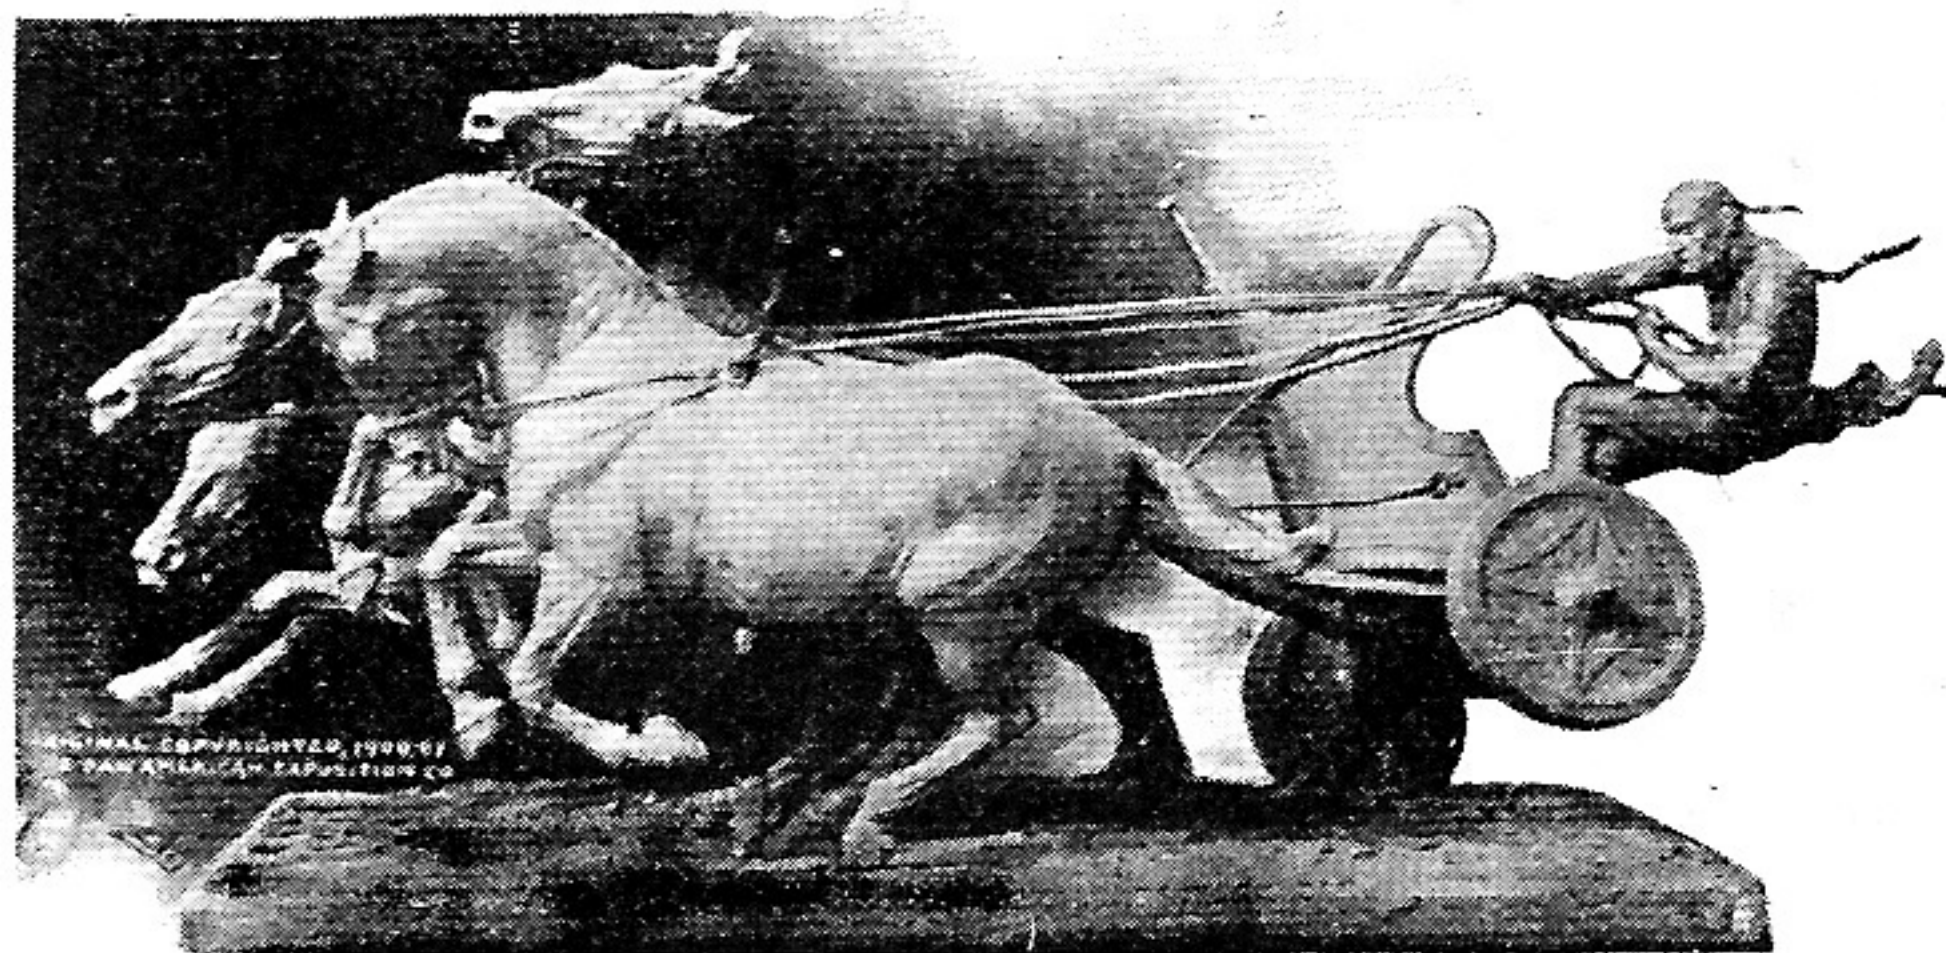

Recently the M. A. Hanna Company, of Cleveland, announced that it would buy 3,000 feet frontage on Niagara River to erect a \$3,000,000 steel plant. Negotiations are now pending.

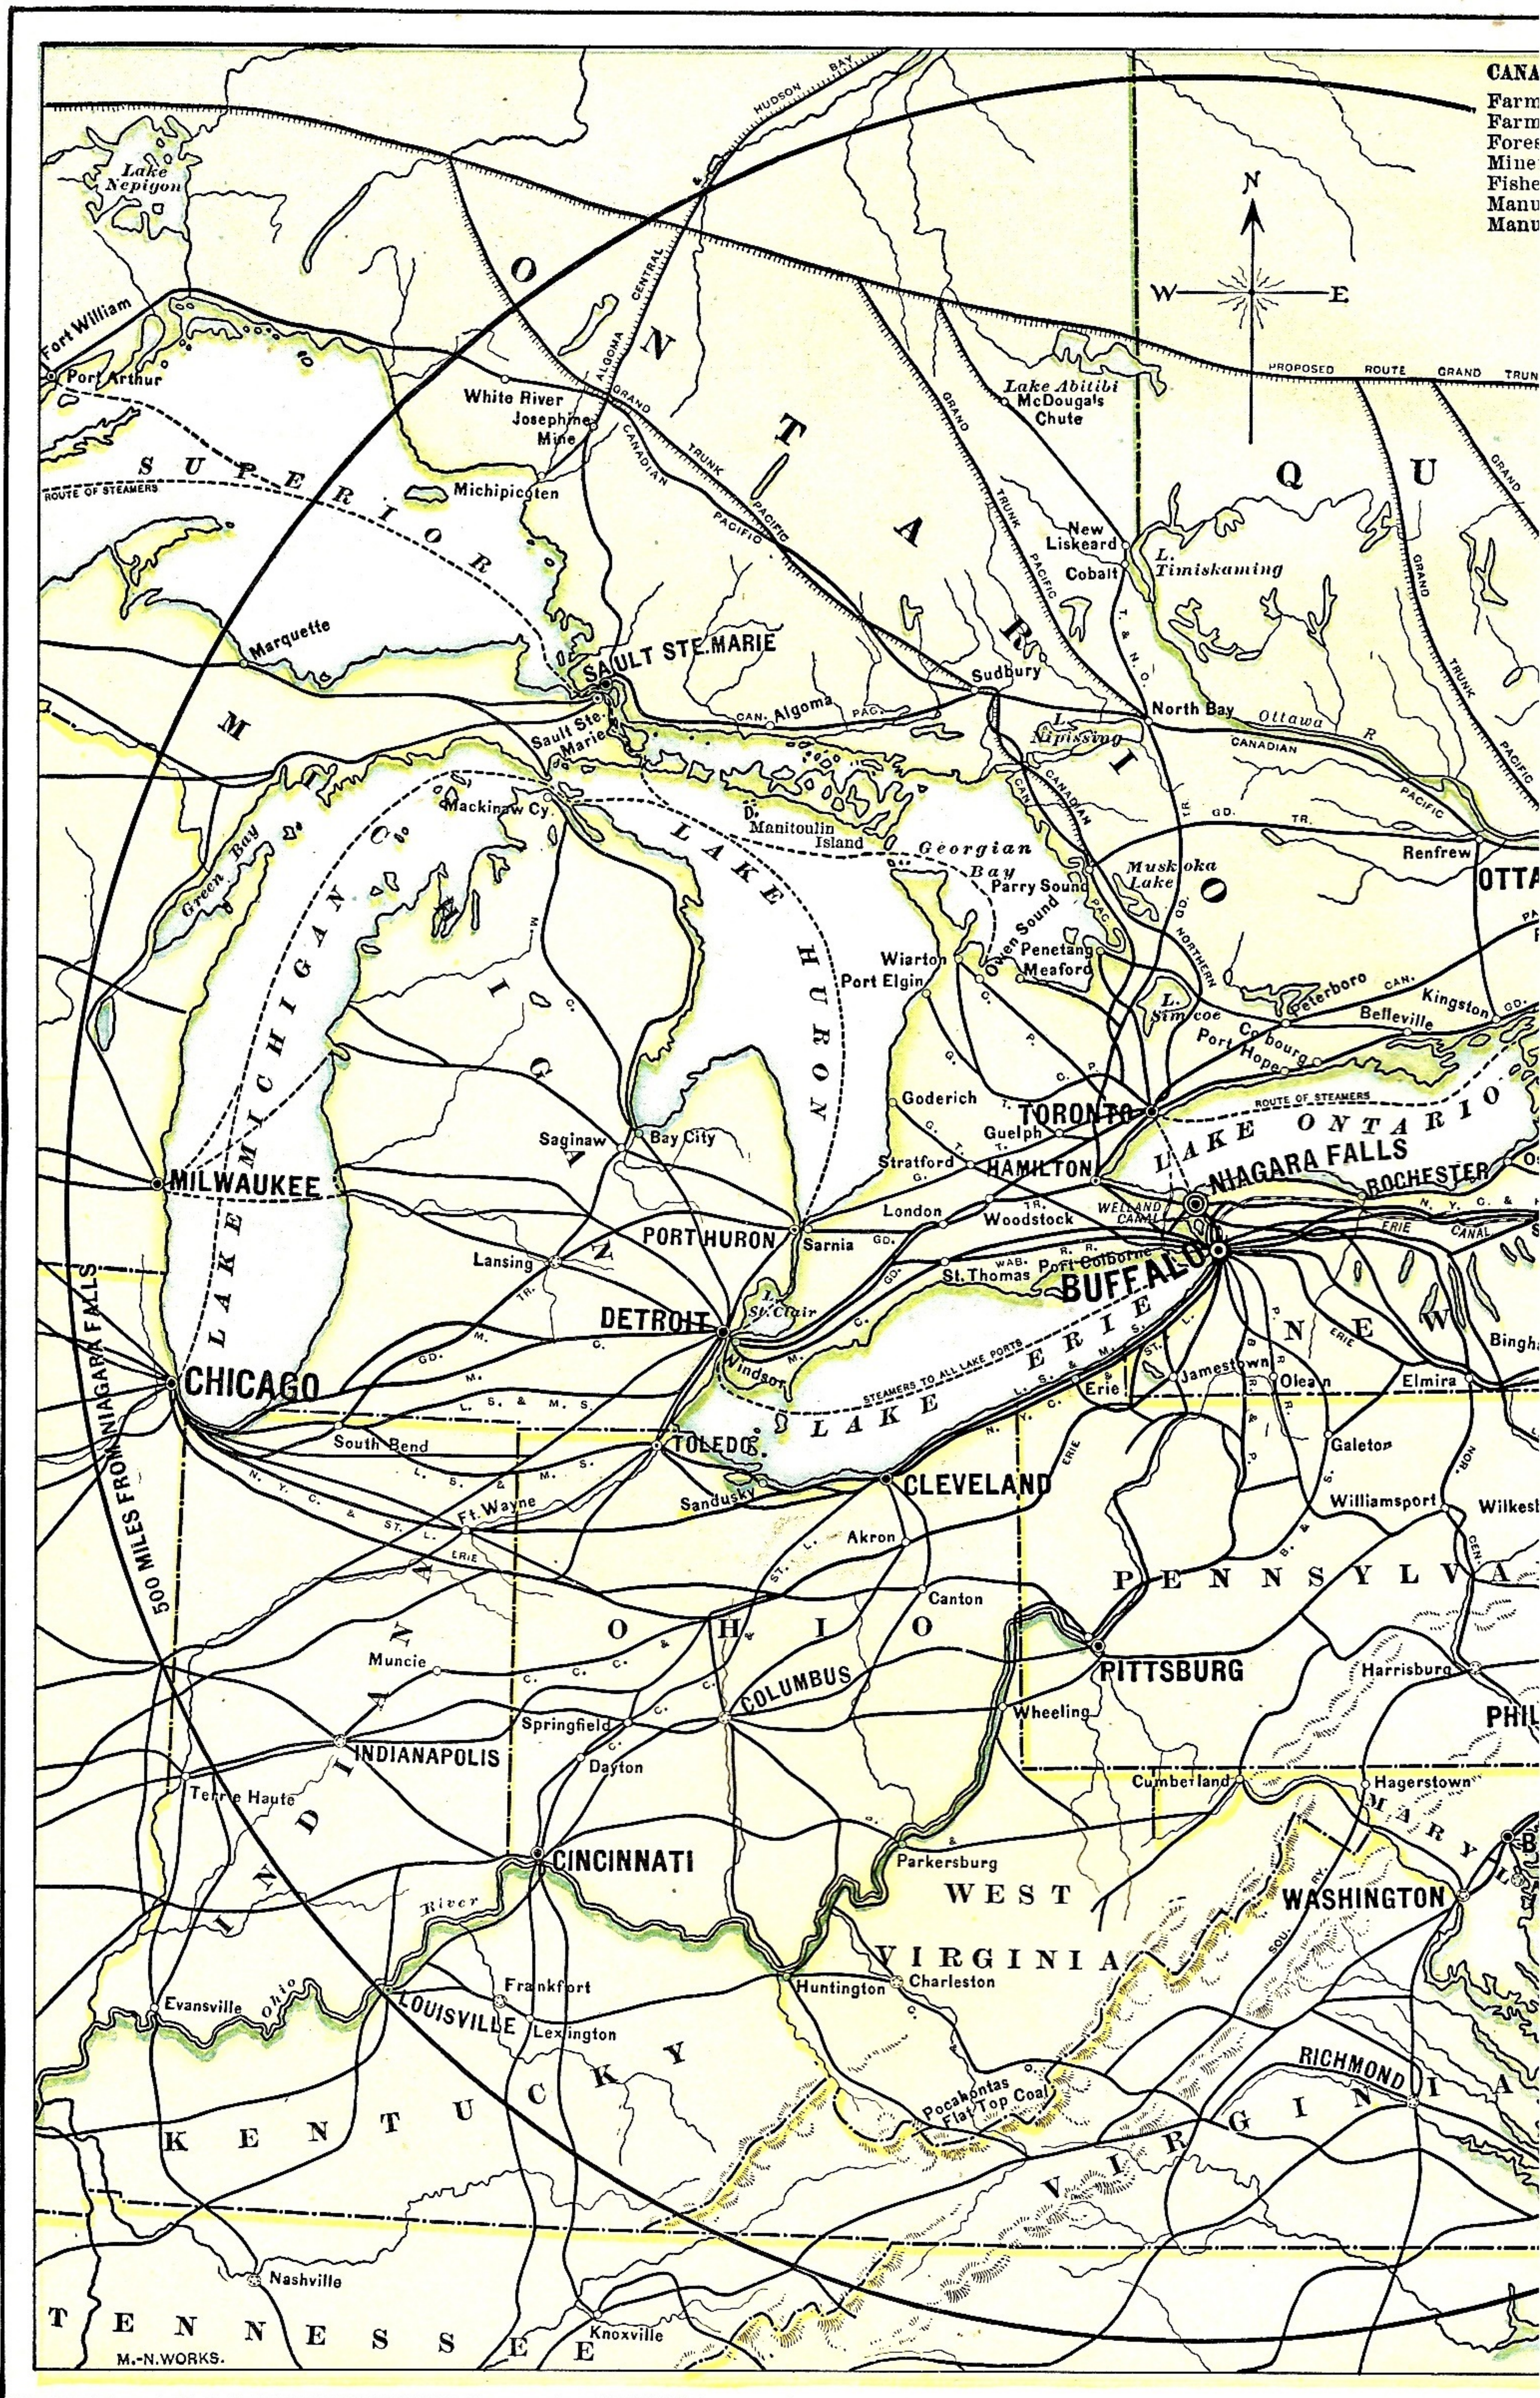

suitable for manufacturing sites. All the steel plants now here have come because they could have dockage in front and railroad tracks in the rear. They can unload ore at the mouths of their furnaces and dump coal from railroad cars on the same dock.

HOMES AND SCHOOLS

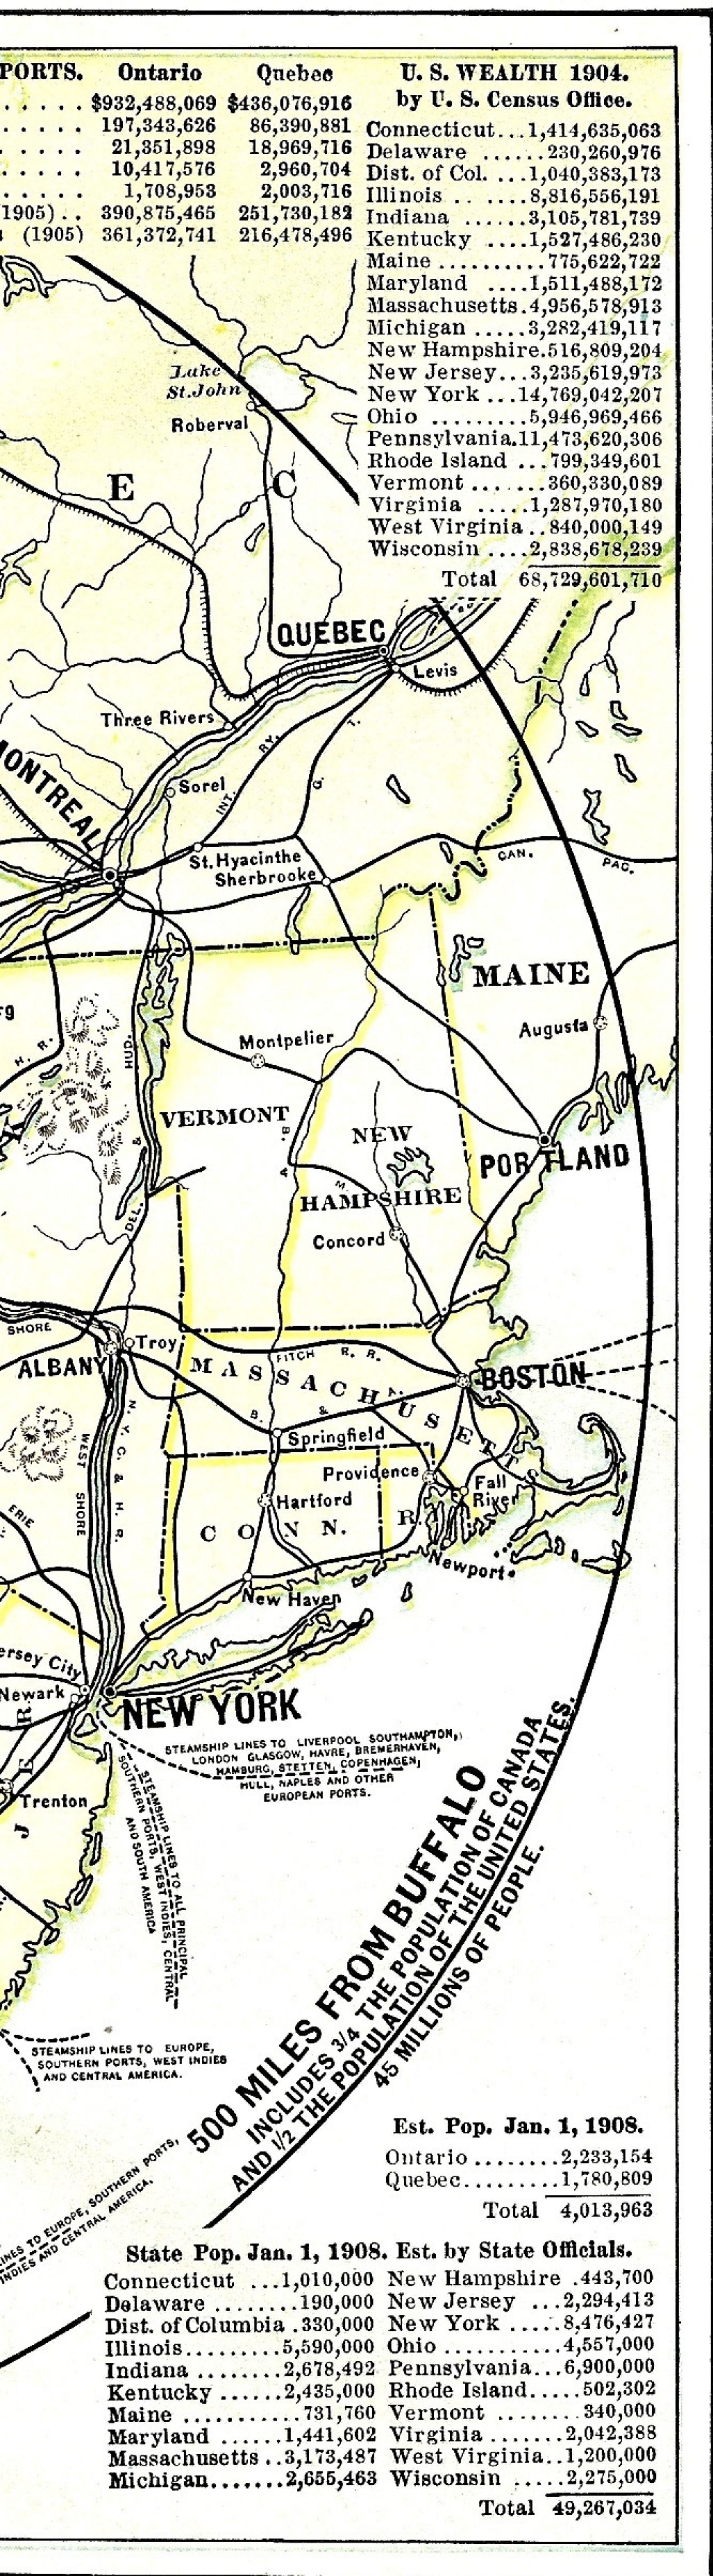

And Buffalo is a good place in which to live — a home city. A single illustration should be enough to show the attention which has been given to this side of municipal development. Buffalo not only provides as fine a system of free schools as can be found anywhere, including a free technical high school, but it also furnishes free text books to every student. A Buffalo child, no matter how poor, can obtain an education, literary or technical or business, up to the college grade, without one cent of expense.

The Manufacturers' Club is giving this exhibition to show what Buffalo is now doing. The evidence of what it is doing is only a partial, yet a convincing, proof of what it can do.

"Made in Buffalo" means something. The Industrial Exhibition proves that

"Bought in Buffalo" means as much. The Hengerer Store proves that

GROWING greater each day because Buffalo people appreciate the right kind of merchandise sold in the right way, to-day the store stands high among the retail establishments of the country.

Referring to but one part of our business, every Buffalonian should know

this: However costly, however beautiful the home to be furnished there is no need of going farther than this store for the furniture, the floor coverings, the curtains and draperies, the china, the lighting fixtures required.

Do you know that our fifth floor is given over to a display of fine furniture, acknowledged to be, not the largest but one of the best selected in the country?

Do you know that the greatest and most valuable collection of genuine Oriental Rugs ever brought to this city is in readiness for you on our fourth floor?

You cannot appreciate the great things this store is doing to make "Bought in Buffalo" possible until you pay us more than a passing visit.

This you are cordially invited to do.

DIAGRAM OF CONVENTION HALL
BUFFALO INDUSTRIAL EXHIBITION, DECEMBER 14-19, 1908

THE LARKIN IDEA

FACTORY-TO-FAMILY DEALING

\$20.00 WORTH OF RETAIL VALUE FOR \$10.00

The Larkin Factories ; over fifty acres of floor space. The largest manufactory in the world whose entire output goes direct to the consumer. Over 45,000 visitors to these factories annually.

Larkin Factory-to-Family Dealing Saves Money

The Larkin Idea is a coöperative, money-saving plan of trading that eliminates all middlemen and saves their profits and expenses for the customer. These saved profits are given with every \$10.00 purchase, as an additional \$10.00 retail value in a premium, or if no premium is desired, \$20.00 worth of Products may be selected. In either instance, \$20.00 worth of unquestioned excellence for only \$10.00. Larkin Factory-to-Family dealing enables every dollar to do double duty. Your money goes twice as far.

Larkin Products are noted for their High Quality and Purity

They include over 200 articles, most of which are needed daily in every home : Coffee, Teas, Spices, Extracts, Baking Powder, Gelatine, and many other Pure Food Specialties, Laundry and Toilet Soaps, Starches, Bluings, Perfumes, Toilet and Pharmacal Preparations, Polishes, Paints, Varnishes, Notions, and Sundries. Larkin Products are accepted in homes where quality is the first consideration. They are produced in factories that are conspicuous examples of industrial progress, under the supervision of experienced manufacturing chemists and experts.

Thirty-four Years of Constantly Increasing Success with Over One Million Regular Customers

A NEW BOOK FOR YOUR LIBRARY

BOOKS are like money in that you never have too many or too much. And as the value of a bank note depends more on the reading it contains than on its size, so with this book.

Also the perusal of this book from time to time in satisfying your wants will result in more bank notes staying with you.

The new method of teaching geography is to begin with the school ground and work out to the boundaries of the world. The new method of teaching commercial geography is on similar lines. My town first.

There is great discussion and making of treaties concerning reciprocity with other nations. But we need no legislative acts to have reciprocity with our neighbors. All we need is the right attitude and to consult this book and the thing is easy of accomplishment.

Every well organized business has an indexed file of catalogs covering all subjects it buys.

Let but this system extend to all firms and households, and the future of Buffalo is not far in the distance.

Let this book head your trade library, let it be the corner stone, and in doing this it will become the corner stone of prosperity for Buffalo.

Every person in Buffalo from infant to grandsire has wants that must be supplied. Nothing will encourage others more to patronize you than your patronage of them. Let "Made in Buffalo" be the passport of goods into your factories, shops, and homes.

READ BETWEEN THE LINES

Commenced Business November 10, 1904, with

CAPITAL,	\$150,000.00
NO SURPLUS,	No Business

On November 10, 1908, our FOURTH BIRTHDAY, we showed

CAPITAL,	\$150,000.00
UNDIVIDED PROFITS (Earned),	40,000.00
DEPOSITS,	800,000.00

Our record for the amount we passed through the *Buffalo Clearing House* is as follows:

SECOND YEAR,	\$40,000,000.00
THIRD YEAR,	52,000,000.00

THESE ARE WONDERFUL RESULTS for a bank of our capital and age to be able to present to the public and we are justly proud of our record. The following well-known officers and directors ably manage the affairs of this institution:

OFFICERS

IRVING E. WATERS, <i>President</i>	ALONZO C. MATHER, <i>Vice-President</i>
WILLIAM LANSILL, <i>Vice-President</i>	CHARLES C. THEOBALD, <i>Assistant Cashier</i>

DIRECTORS

REMEMBER THIS BANK

makes a specialty of active business accounts. The officers personally endeavor to have their institution—a strong, conservative, yet progressive one—meet satisfactorily the requirements of its depositors. For this reason we are referred to as “the Bank of Personal Service.” We welcome new business enterprises coming to our city, and would extend to them the same courtesy and interest in their welfare that we do to those already located here. Come to us if you contemplate establishing, changing, or increasing your banking relations.

ILLUMINATION

This exposition afforded us an opportunity to demonstrate our ability to satisfy all the Electrical wants of Manufacturers, Stores, Offices, and Residences, in the quickest time consistent with good workmanship. We installed three thousand electric lamps in twenty-four hours in this Hall. Immediate lighting systems installed for temporary or permanent use is our specialty. ¶ Electric Motors of all sizes and kinds, telephone systems and all other branches of Electric work installed in an up-to-date manner. ¶ Call us up — “the real live ones.” Both Phones.

FAXON'S BREAD

*WE HAVE MADE A STUDY FOR YEARS OF BREAD
MAKING AND BELIEVE WE HAVE
ATTAINED PERFECTION*

OUR bread is made from the best quality of flour that can be obtained; our bread makers are artists in their line; our bread kitchen is a model of cleanliness and the equipment is absolutely up-to-date.

☞ The loaves are light without being spongy, each loaf, "baked to a turn," is sweet and palatable.

LIQUID VENEER

THINK OF IT, MADAM!

A little child can renew your Piano, Furniture, and Woodwork by just wiping the surface with a cloth moistened with Liquid Veneer.

When we say renew, we mean that the whole interior of your house, from the parlor to the kitchen, from a \$1000 Piano to a 50c. Kitchen Chair, can be made to glisten just like new, with no labor at all, just wiping the surface as though dusting with a cloth. It's simply wonderful as a cleaner and disinfectant. It will draw grimy, dusty matter from every nook, corner, and crevice and carry it away with the cloth, leaving the surface smooth, sanitary and with a beautiful, high glossy newness.

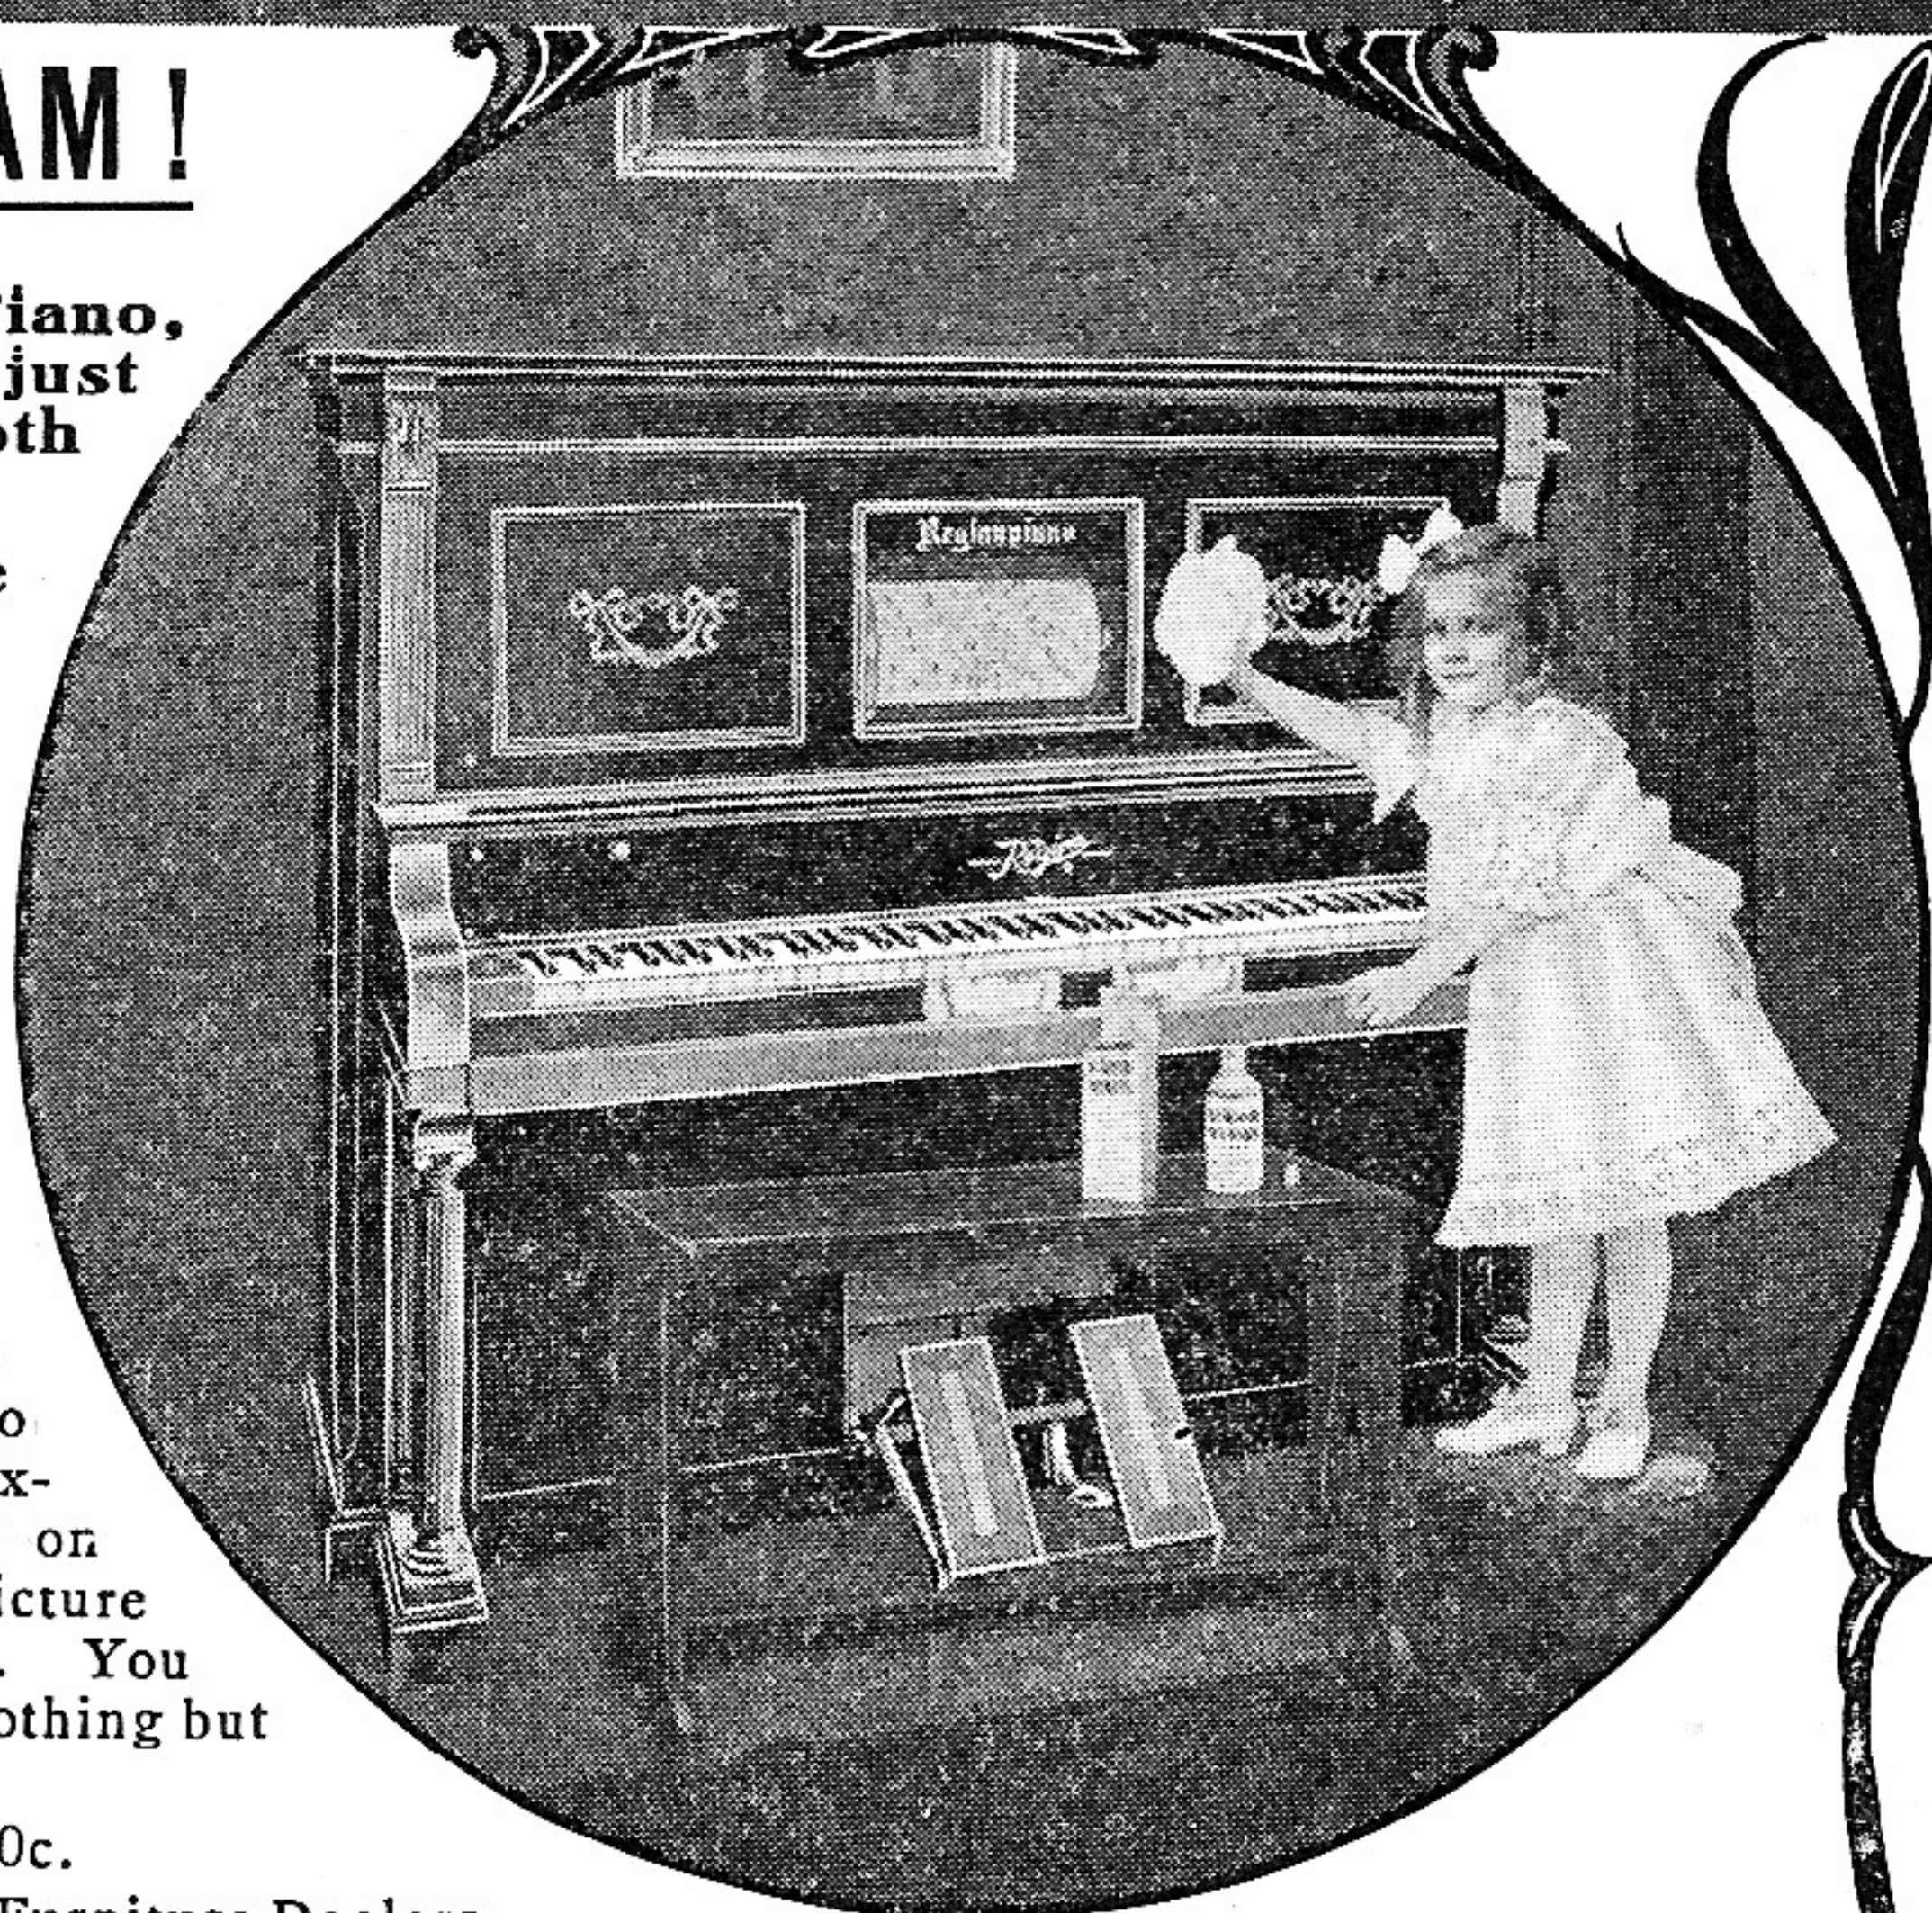

THINK OF IT! There's no drying to wait for, **it's not a varnish**, no stickiness, muss, brush, or cans, no expensive painters to bother with. Try it on your next dusting day. Use it on your picture frames, fancy gold chairs, chandeliers. You will get nothing but delightful results; nothing but good.

Large bottle renovates average home, 50c.

At Grocers, Druggists, Hardware, and Furniture Dealers.

BUFFALO SPECIALTY CO.

375 Ellicott Street, BUFFALO, N. Y.

Sanitary Horse Cleaning Device

Greatest Money, Time, and Labor Saver

Enables the owner of horses to obtain better results at a smaller cost.

It is easy to manipulate. Takes but a few minutes to acquaint your help with the handling of this apparatus.

Has connections for from 1 to 4 tubes, enabling the cleaning of 4 horses at the same time. Tubing can be led to any part of the stable.

Removes every particle of dust, dirt, hair, dandruff or scurf. Opens the pores. No dust to fly in the air, which may cause disease.

Does the work in one-tenth the time.

¶ One of the most valuable assets of a bank is the good will of its depositors gained by its services to them year in and year out during good times and bad times.

¶ Upon this point we refer the public to our depositors.

THERE is much to be taken on faith when buying **Diamonds, Precious Stones, and Jewelry** of any kind. ¶ There is great satisfaction in purchasing from a house of undoubted responsibility. We are ready to stand behind every article purchased from our stock. ♣ ♣ ♣

MAKE YOUR MONEY WORK

THE shares of the Automatic Transportation Company will in the near future be prized among the most valuable securities of this country. Why not share in these profits?

A limited number of these shares are now being sold and an opportunity is presented to you, the equal of which has not been offered to the public since the introduction of the Telephone or the electric light. Make it a business to know all about this proposition. Investigate for yourself.

---	---

BUFFALO Manufacturers ought to have the best printing in the world, for the best printing office in the world is in Buffalo.

There are a few (*very few*) larger printing offices than the Complete Press of The Matthews-Northrup Works. There are a few (*mighty few*) offices that do some things as well as they do them ; but no printing establishment anywhere does anything like as much fine work as is done at the corner of Exchange and Washington streets in Buffalo.

The Unique Advantage which a Buffalo Manufacturer has in placing his printing is that he can in person visit "The Complete Press," where alone in the world every typographic process is practiced at its best ; and can inspect in the Show Rooms of the Company specimens of every kind of Advertising literature.

It is a Permanent Exhibition of Printing of every kind, arranged so as to admit of instant reference. Some of the kinds may be just what you need, and otherwise would never have thought of.

Remember, if it's postal cards in colors, we take the photographs, color them to your exact taste, and reproduce them absolutely ; if it's a descriptive book, we write it, illustrate it, print it, and bind it ; if it's a catalogue, we do it all for you, and all right, from the photographing and engraving to the mailing. Or we do any part of it. Or any other kind of work from a bill-head to an Encyclopedia.

No Buffalo Manufacturer can be excused for not knowing much about printing. He has the best chance in the world ; for at his door is the One Establishment where he can find what he wants and get it, as he wants it.

The Exhibit is open from 9 to 6 every day in the week on the second floor of The Matthews Building, corner Exchange and Washington streets.
